NOTICE TO PARENTS, FACULTY, STAFF and YOUTH CAMPS

The energy upgrade project at Newtown High School will start soon. The project involves the demolition of three boilers in the mechanical room this summer.

The asbestos abatement portion of this project was authorized by the Connecticut Department of Public Health, after careful planning and thorough review. To insure that the work will present no risk to staff and students in other areas, physical barriers will be constructed to isolate the vacant from the occupied areas of the school. The asbestos abatement work will be performed by a State-licensed asbestos abatement contractor, AAIS Corporation, and will be continuously monitored by Brooks Environmental, LLC., an independent environmental consultant. The monitoring will include, pre-work inspections, visual inspections and air monitoring during the abatement process, visual inspection following final cleaning of the work area, and air testing of the work area to certify that reoccupancy by the public is allowed.

As required by the Connecticut Department of Public Health, this notification is being sent to all groups who will be using or occupying Newtown High School this summer. Any questions about the project can be directed to the Director of Business, Ron Bienkowski, at 203426-7619.

Project Start Date: Tuesday, June 17, 2019
