

The subcommittee agrees that the board should consider voting on changes to the budget after the LC adoption before the public vote because it will benefit the public to understand the direction of the board.

Other issues discussed:

How do we handle the issue of changes made when the budget is complete?

How are we going to communicate what will be done when reductions are made?

Suggestion: "this is our priority at this budget level, if it fails our priorities are different"

Suggestion: "every budget failure is the beginning of a new initiative"

In order for this to work, we need to figure out how we manage what the initiatives are after a budget failure. The subcommittee thinks that we need to be more black and white. Perhaps a board goal to address each change to the budget when it occurs.

How can we get the public to understand that the budget is always fluid and there is no contingency?

Website doesn't appear to have past agendas, a request was made to have those from this school year matched up to the minutes as they are with the subcommittee pages.
