

BOE Technology Committee

October 8,2018

Attendance: Andrew Clure Committee Chair  
Dan Delia, BOE  
Carmella Amodeo, Director of Technology

Called to order: 10:03

Public Participation: None

Communications/Announcements: None

Unfinished Business: None

Carmella stated she is very comfortable with the dollars that are for Technology in the budget process. She explained that we are also funded by Universal Services through ERate funding, which is used for networking projects..

We are moving to a managed service for a virtual environment, which is shared with the Town. We will be using NOVUS, this will mean a dollar change in accounts, less in equipment dollars and dollars added to contracted services.

Discussed running an audit and/or a Pen test on the firewalls. Carmella is to get quotes for pen test and firewall evaluation. Look at the possibility of contracting for more than one year.

Technology Department is now at full staff, the Department was short a networking person for a year, someone was hired in August.

There is a fair amount of time spent on Data Privacy Contracts to be in compliance with the Ct Public Act Number 16-189. Carmella to look at the possibility of requesting a part time position to free up some her time from this task.

Carmella stated that the website is in a redesign phase which will make it also ADA compliant. Andy requested looking at making it easier to read for events and fees.

Meeting to be scheduled for November.

Meeting adjourned at 11:10am.

Respectfully submitted,

Carlen Gaines
